

## ***Jackpots & Wide Area Mysteries***

---

Jackpots are an invaluable marketing tool in any casino. The ACE jackpot management application allows operators to customise system jackpots to maximise revenue, boost game play and target specific players with fully configurable member jackpots.

### ***Mystery Jackpots***

Run up to four mystery jackpots on any machine connected to the ACE System. With this great multi-level jackpot tool, operators can configure awards with a range of payout options including, pay-to-card and handpay. In addition to cash jackpots, run exciting fixed prize rewards such as car giveaways, iPads and mini breaks. This application even allows operators to define jackpots on specific machines or banks, boosting performance across the gaming floor and attracting players to less popular machines.

Machine driven progressive jackpots are also fully supported by the ACE System.

### ***V.I.P & Group Jackpots***

Attract new players with fully customisable group jackpots; from special events to seasonal celebrations, golf tournaments and corporate days to local festivals, having this fantastic tool at your fingertips means any combination of jackpots is possible. Draw on your member-grading tools and incentivise players to move up the ranks by creating V.I.P. jackpots for your platinum and gold members.

### ***Wide Area Jackpots***

This is a fantastic feature for casino groups looking to run common mystery jackpots across all their venues. By linking machines from multiple venues to one jackpot, operators can offer high-value rewards across their group.

### ***Jackpot Displays***

All promotional jackpot displays can be configured and managed from one central application using the ACE System media management tool. For more details on the features available, please see our Media Management page.
