

Media Management

Manage multiple jackpot LCD displays in your venue, import your own custom backgrounds or choose from a selection of preloaded templates, all from one application with the ACE System Media Pro module.

Jackpot Display Engine

ACE Media Pro allows you to run up to four ACE mystery jackpots per LCD screen in your venue. This is an easy-to-use and cost-effective marketing tool, useful in creating jackpot awareness, highlighting particular banks of machines running specific jackpots and informing players on special member group jackpots.

Jackpot Audio Links

Add to the thrill of a jackpot winner by linking in your choice of music or audio jingles to play whenever a mystery jackpot hits.

Templates & Custom Backgrounds

Choose from our range of background templates or better yet, import your own custom designs into our application and manage all the mystery jackpot displays in your venue from one application. Whether it be for a one-off giveaway or a weekly mystery jackpot, store all your designs within the Media Pro application, ready to be used at the click of a button.
